Description: Caches Found In Elevator Shafts

Upon daily maintenance inspections of the elevator shafts in the east wing, specifically in the third and fourth elevators that shuttle through directly to the library and indirectly to the cockpit, three caches were found hidden behind panelling in the shafts. All items had been stripped of their identification tags, but have been traced down to belonging to a Dave Fenne, an A.I Development Specialist. Fenne had previously reported these belongings as missing, through the appropriate channels. The scenes have been left undisturbed.

It is unclear at this moment in time whether or not this was a hazing incident, or if there is an interloper on board. Please forward to R&D, and follow up to this e-mail address.
